Mobility-as-a-Service (MaaS) and Demand Responsive Transport

Marco Boero
MOBILITY ADVISOR

MaaS = Digital Transport + inter-/multi-modal mobility

Public/private cooperation, aimed to offer more accessible and sustainable mobility solutions

The **enabling platform** for effective management and operation of **Mobility-as-a-Service** solutions

- Integration of mobility services: Local Public Transport (bus, metro, tram, cable railways, elevators), demand responsive transport, car-sharing, bike-/scooter-sharing, parking, Point of Interest (POIs) and other
- multimodal travel planning
- service booking
- e-ticketing, e-payment

ALL MOBILITY SOLUTIONS IN THE AREA JUST A TAP AWAY

USE CASE

TeleBus DRT in **Krakow** (PL), local PT operator (MPK), a *feeder* service in suburban areas

Demand Responsive Transport: flexible services, **dynamically** adapted to actual mobility **demand**, with a view of **sustainability**, high **quality service** and territorial **accessibility**

- The complete software platform supporting **all phases** of DRT service production chain: **planning**, **optimisation** and **operational management** of **demand responsive**
- **The leading solution** in the reference market: over 60 DRT services powered in metropolitan and urban areas, suburbs, rural areas and 'mountain communities', mobility impaired users, home-work and corporate mobility, etc
