Smart Integration Case Study UniCredit

Roberto Catanzariti
KEY ACCOUNT MANAGER

«We Spend too much time managing suboptimal confort reports»

"The solutions from the technology vendors are vveryery expensive and not scalable!"

«We are not able to periodically check all the equipments in order to identify anomalous behaviour»

"We are unable to set general policies, differentiated by geographical area and period of the year (calendars), for the switching on / off of the systems!"

Target: Remote control of HVAC systems of medium-sized branches

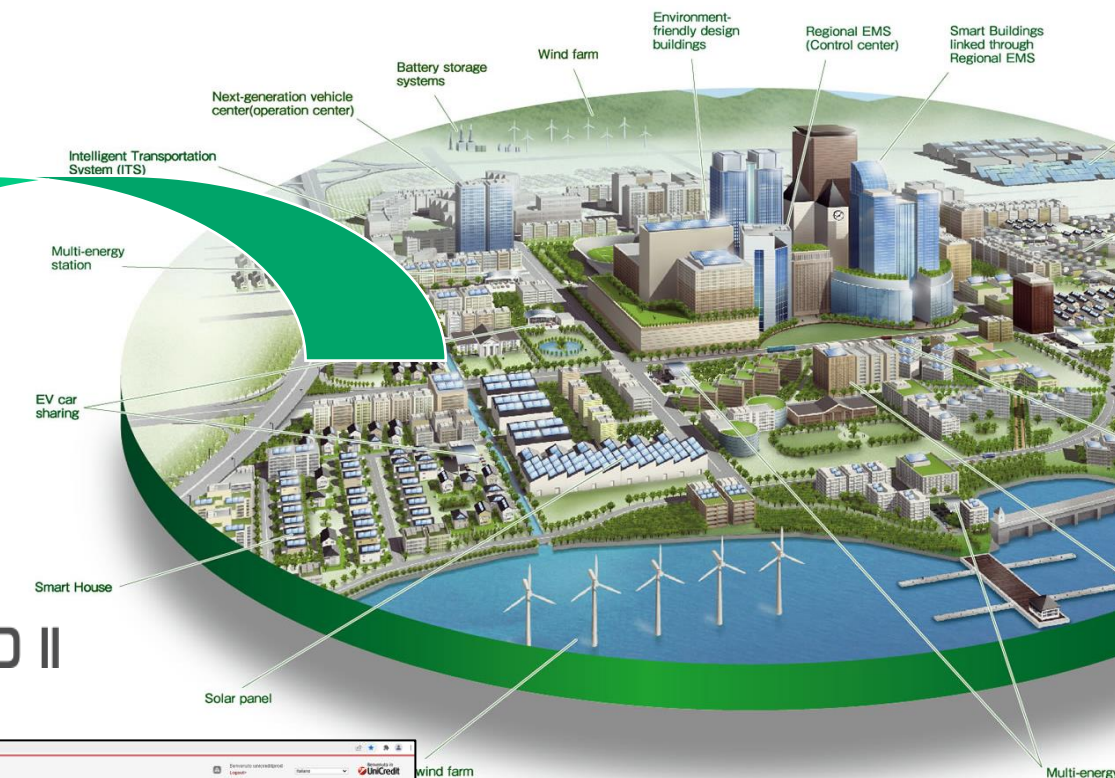

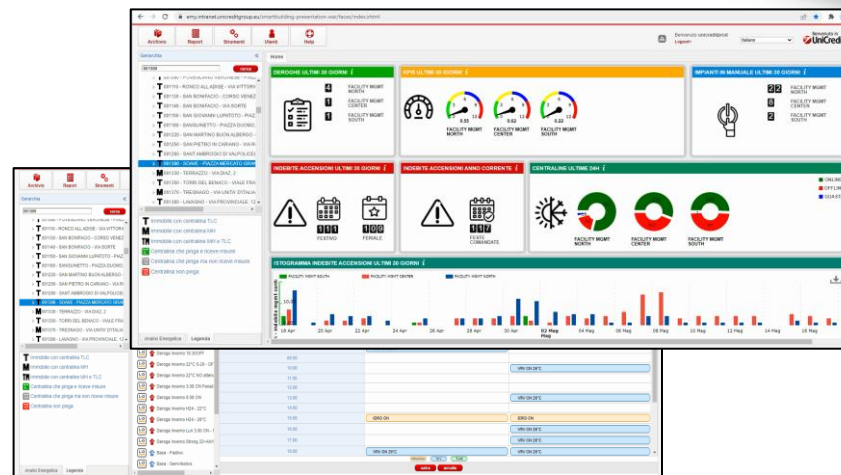

Benefits:

- Integrated and massive management of the systems by the global services
- Increase in the value of real estate assets

Duration: platform running since 2014

ER ADVERTO II
