algoWatt: contract awarded in Poland for the provision of a PersonalBus app for the management of flexible transport services

algoWatt, GreenTech Solutions company listed on Borsa Italiana's electronic stock exchange (MTA) announces to have signed the contract for the development of a solution for the management of the flexible on-demand Tele-Bus service operated by *Miejskie Przedsiębiorstwo Komunikacyjne Spółka Akcyjna* (**MPK S.A.**), a public transport operator based in Krakow (PL). algoWatt awarded the contract in a European tender and related selection process involving several other multinational providers.

The contract provides for the development of the platform for the management of the DRT public transport service, which includes the application for the planning, optimization and execution of the service by the operator, the app dedicated to the driver for the management of the trips and the app for the booking of the service by customers. The solution that will be provided to MPK is based on the PersonalBus platform, developed over the years by algoWatt, successfully used by many operators in Italy and recently renewed with the latest technologies.

The contract has a duration of 30 months of which 6 months for development and 24 months of operational maintenance for which algoWatt will use local operators.

MPK is one of the largest public transport operators in Poland and the choice of the solution implemented by algoWatt demonstrates the company's leadership in the flexible mobility sector, providing a solid reference for a possible development of the foreign market.

This press release is available on the Company's website www.algowatt.com.

algoWatt (ALW), *greentech solutions company,* designs, develops and integrates solutions for energy and natural resource management in a sustainable and socially responsible manner. The Company provides management and control systems that integrate devices, networks, software and services with a clear sector focus: digital energy and utilities, smart cities & enterprises and green mobility. algoWatt is the result of the merger of TerniEnergia, a leading company in the renewable energy and environmental industry, and Softeco, an ICT solutions provider with over 40 years of experience for customers operating in the energy, industry and transport sectors. The company, with more than 200 employees located in 7 locations in Italy and investments in research and innovation for more than 12% of turnover, operates with an efficient corporate organization, focused on the following markets: Green Energy Utility: renewable energy, digital energy, smart grids; Green Enterprise&City: IoT, data analysis, energy efficiency, building and process automation; Green Mobility: electric, shared and on demand. Different markets, a single focus: sustainability. algoWatt is listed on the Mercato Telematico Azionario (MTA) of Borsa Italiana S.p.A..
